Fire Department Incident Safety Officer

Course Description:

The goal of this course is to prepare students who will be designated by an incident commander (IC) as the incident safety officer (ISO). This course will teach students how to monitor the various types of incidents including Fire, EMS, Technical Rescue, and Hazardous Materials scenes, and report to the IC the status of conditions, hazards, and risks present. This course will also cover accident investigation and review procedures as well as how to develop and participate in a post-incident analysis.

Cost: \$500/per student

Dates: June 2-6, 2025

Time: 8:00AM – 4:00PM CDT

Location: Orland Training Facility – Main Classroom
10728 W. 163rd Pl
Orland Park, IL 60467

Course Materials: E-book provided by ISFSI day of class

*To attend this training, please complete education request and email to:
OFPD – Training Officer*

Blue Card will present a 3-day training event for BLUE CARD INCIDENT COMMAND on June 16-18, 2025. This training will be for fire departments and fire districts. The location will be at the Orland Fire Training Facility in Orland Park, IL.

CONFINED SPACE RESCUE AWARENESS AND OPERATIONS

Course Description:

The scope of this course is to prepare local responders to operate as a local member of a regional team within the NIMS at a CBRNE (Chemical, Biological, Radiological, Nuclear, or Explosive) WMD Event requiring statewide response that has resulted in the need for a high-angle rescue. This course provides those personnel with the basic knowledge and skills needed to perform rescues using rope systems. The class will cover the use of rope, rope equipment, hardware, construction of mechanical advantage systems, belay and safety systems, anchor systems, and patient packaging. Special consideration will be given to the policies of standard-making agencies such as OSHA, ANSI, NFPA, and others. This course awards Pro Board certification.

Cost: Please refer to IFSI website

Dates: June 23-27, 2025

Time: 8:00am -5:00pm

Location: Orland Fire Protection Training Facility
10728 W. 163rd Place
Orland Park, IL 60467

SMALL UNMANNED AIRCRAFT SYSTEM OPERATIONS – NFPA 2400

Course Description:

Students successfully completing this course will be eligible for ProBoard and IFSAC certification under NFPA 2400 Chapter 5, Professional Qualifications for sUAS Public Safety Personnel, which identifies the job performance requirements for public safety Remote Pilots and Visual Observers. Students will review Crew Resource Management, the roles of the Visual Observer, the Person Manipulating the Controls, and the Remote Pilot in Command. Students will learn the sUAS team's role and function within the Incident Command System (ICS). Students will learn sUAS flight mission planning and prepare a mission plan for a given public safety scenario in a real-world setting. Students will prepare for and engage in practical flight operations, developing mission-critical neuromotor and communication skills.

NFPA 2400, Standard for Small Unmanned Aircraft Systems (sUAS) Used for Public Safety Operations, 2019 edition details the minimum requirements for the safe operation, deployment, and implementation of sUAS including organization program criteria and considerations, professional qualifications for safety personnel, and elements of a maintenance program. It was created with support from the National Institute for Standards and Technology (NIST) and the American National Standards Institute (ANSI).

Cost: \$1,400.00 /per student

Dates: July 7-11, 2025

Time: 8:00 am –5:00 pm

FIRE APPARATUS ENGINEER

Course Description:

This 40-hour course is designed for firefighters who are assigned to or may be assigned to operate fire department apparatus in the normal course of their duties. This course is designed to develop firefighters understanding of mechanical principles of fire pumps and their controls, principles of water and water distribution systems, intake and discharge hydraulics, fire stream production, relay pumping operations, care and maintenance of pumper apparatus, and troubleshooting. Students will practice producing effective fire streams from hydrants, relay operations, and static water sources. Students will also practice determining pump discharge pressures for hydraulic situations that range from single line problems to multiple-line relay operations to provide a solid understanding of fire ground hydraulics and practical solutions to apply these concepts to their department.

Cost: \$700.00 per student

Dates: August 18-22, 2025

Time: 8:00 am – 5:00 pm

Location: Frankfort Station 73
333 W Nebraska St.
Frankfort, IL

FIRE INVESTIGATOR BLENDED

Course Description:

This 120 hour class is designed as the foundational level of education and training for fire and arson investigators. The program meets the Job Performance Requirements of NFPA 1033 "Professional Qualifications for Fire Investigator." The investigation program includes comprehensive courses covering multiple topics and requiring significant student participation, reading and homework activity. The course includes the following topics: Basic fire science, fire patterns, building systems, electricity and fire, fuel gas systems, fire related human behavior, legal considerations, safety, sources of information, planning the investigation, Documentation of the investigation, physical evidence, origin & cause determination, analyzing the incident for cause and responsibility, failure analysis and analytical tools, explosions and incendiary fires, fire and explosion deaths and injuries, appliances, motor vehicle fires, wild fire investigations, management of complex investigations and marine fire investigations. The text book included with the course is "Fire Investigator: Principles and Practice." Primary resources for the program are NFPA 921 "Guide for Fire and Explosion Investigations" and "Kirks Fire Investigation." The practical requirement for the class will involve outdoor simulated scene work. Firefighting gear is not required for the class but old clothes, gloves and work boots are recommended for the practical activity

HAZARDOUS MATERIALS TECHNICIAN

Course Description:

The goal of this 80-hour course is to prepare responders to operate as a local member of a regional hazardous materials response team within the National Incident Management Systems (NIMS) at a CBRNE (Chemical, Biological, Radiological, Nuclear, or Explosive) event requiring a statewide response. The course provides the essential knowledge, skills, and abilities to operate offensively or defensively at an incident involving the release of hazardous materials. The objectives of the course are to teach participants: to classify, identify, and verify known and unknown material by using field survey instruments and equipment; to select and use the proper chemical protective equipment provided to the hazardous materials Technician; to understand hazard and risk assessment techniques for Hazmat and CBRNE environments; to be able to perform advanced control, containment, and/or confinement operations within the capabilities of the resources and personal protective equipment available; and to develop action plans within the parameters of the State plan for statewide response to WMD events.

Cost: Please refer to IFSI website

Dates: September 22-26, 2025
September 29 – October 3, 2025

Time: 8am –5pm
